Abstract (en)

[origin: CN112828948A] The invention relates to a razor (1) comprising a handle (2) and a head (3) which is pivotably arranged on the handle (2), the head (3) having a frame (7) and a cover (15), and at least one razor blade (13) which has a cutting edge and which is supported between the frame (7) and the cover (15). The razor is characterized in that the razor blade (13) is pivotably arranged on the handle (2). The at least one wiper blade (13) is mounted in a replaceable manner between the frame (7) and the cover part (15), the at least one wiper blade (13) can be inserted between the frame (7) and the cover part (15) by means of an actuatable fastening member (16, 17, 18, 19), and the fastening member (16, 17, 18, 19) is arranged close to a side edge of the at least one wiper blade (13) relative to a cutting edge of the at least one wiper blade (13).
