Abstract (en)
[origin: EP3825941A1] Disclosed are a method and device of issuing a reward to a work publisher on the basis of a blockchain. A blockchain network includes a plurality of service nodes, the service nodes have authorities to publish works to the blockchain, and the plurality of service nodes use a virtual resource as a transfer medium to conduct copyright-related transfers. For a service node publishing a work, a reward is issued to the service node by means of a consensus mechanism in the blockchain network, such that virtual resources corresponding to the service node are increased.
