Abstract (en)

[origin: WO2020020547A1] The invention relates to the use of a use of a multi-layered layer structure (1) for an element (2) for use as a floor, wall, ceiling, furniture, decoration, interior construction element, preferably a strip, profile, edge, door and/or window element, facade, wallpaper, car interior, car exterior and/or outdoor cover element having at least one decorative layer (7) and at least one metallic and/or metal-containing metal layer (4). The decorative layer (7) is designed in particular such that the metallic layer (4), in particular the upper side which faces the user side (6) is visible at least in regions, preferably optically recognizable and/or optically transparent.
