Abstract (en)

[origin: WO2020020546A1] The invention relates to the use of a multi-layered layer structure (1) for an element (2) for use as a floor, wall, ceiling, furniture, decoration, interior lining element, preferably a strip, profile, edge, door and/or window element, as a facade, wallpaper, car interior, car exterior and/or outdoor cover element having at least one film layer (3) and at least one metallic and/or metal-containing metal layer (4). The multi-layered layer structure (1) is provided for changing and/or improving functional-technical properties and/or element functions (2).
