Abstract (en)

[origin: WO2020021049A1] The invention relates to a packaging (100) intended to protect a consumer good, comprising on all or part of the internal surface (10) thereof a coating (11), wherein the coating (11) is formed by the deposition of one or more inks according to a repeated pattern (12), capable of ensuring the protection of the consumer good against artificial electromagnetic radiation. The invention also relates to the use of such a packaging for protecting the consumer good from degradation caused by an artificial electromagnetic radiation.
