Abstract (en)

Proposed are a golf shoe and a method for manufacturing same. The golf shoe, according to one embodiment, includes: a sole having an outsole and a midsole; and an upper formed on the top portion of the sole, wherein a plurality of protrusions are formed on the front- or rear-side of the outer lateral surface of the midsole. Accordingly, foreign substances may be removed by rubbing a clubface on the protrusions of the midsole, and the foreign substances may be removed by means of only a minimum action, and thus the sensation of a practice swing may be maintained without being damaged, and thus an effect may be achieved of enhancing athletic performance.
