Abstract (en)
The present disclosure relates to a blank for forming a packaging component, said blank comprising: at least four blank portions; at least two fold lines; a first opening extending through a first blank portion and a second blank portion of the at least four blank portions, wherein the first opening is substantially symmetrical or self-similar with respect to a first fold line of the at least two fold lines, said first fold line being provided between the first blank portion and the second blank portion; and a second opening extending through a third blank portion and a fourth blank portion of the at least four blank portions, wherein the second opening is substantially symmetrical or self-similar with respect to a second fold line of the at least two fold lines, said second fold line being provided between the third blank portion and the fourth blank portion. The present disclosure further relates to a packaging component, a packaging unit and packed product.
