Abstract (en)
[origin: WO2020025702A1] The invention relates to a moving device by means of which a storage container (10) can be moved to provide a storage system (100) having a storage container (10), a lowering device and an attachment device, wherein said system is easy to access without requiring great use of force while making use of unused room areas, wherein the storage container (10) can be lowered by means of rotation about an axis of rotation and movement by means of the moving device for transition from a storage position to a removal position.
