Abstract (en)

[origin: WO2019220163A1] Automated recovery system (2) configured to separate and recover recyclable components from a spent container (4) which is at least partly filled with a beverage particulate material, the recovery system comprising container lid removal means (17) configured to remove and recover a lid portion (25) of the spent container, container bottom removal means (19) configured to remove and recover at least a portion of a bottom (33) of the spent container, and beverage particulate material evacuation means (18) configured to evacuate particulate material from within the spent container and recover the beverage particulate material, wherein the container lid removal means, container bottom removal means, and beverage particulate material evacuation means are configured to operate together to provide a separate body portion of the spent container substantially free of any beverage particulate material, the automated recovery system further comprising body portion recovery means.
