Abstract (en)
[origin: WO2020025154A1] The invention relates to a tube head (5) for a tubular packaging (1), wherein the tube head (5) consists of a tube shoulder (6), a tube nipple (7), and a tamper-proof element (10). An edge region (6.1) of the tube shoulder (6), said edge region facing away from the tube nipple (7), is designed for connection to a tube casing, wherein the tube nipple (7) projects over the surface of the tube shoulder (6) in a direction away from the tube shoulder (6) edge region (6.1) designed for connection to the tube casing. The tube nipple (7) has an outlet opening (8) in a portion facing away from the tube shoulder (6). The tamper-proof element (10) is located in the region of the tube nipple (7) and completely separates the outlet opening (8) from a tube head interior TKI. The tube head (5) having the tube shoulder (6), tube nipple (7) and tamper-proof element (10) is designed as a one-piece moulded plastic part.
