Abstract (en)
[origin: WO2020025155A1] The invention relates to a tubular packaging (1) comprising a tube casing (2), a tube head having a tube shoulder (6) and a tube nipple (7), and a closure cap (13) having a casing portion (13.1) and a lid portion (13.2). The closure cap (13) engages around the tube nipple (7) with at least one portion of its casing portion (13.1). The tube nipple (7) has an outlet opening (8) in a portion facing away from the tube shoulder (6). The tube shoulder (6) is connected to the tube casing (2) in an edge region (6.1) facing away from the tube nipple (7), wherein the tube nipple (7) projects over the surface of the tube shoulder (6) in a direction away from the tube casing (2). The tube head having the tube shoulder (6) and the tube nipple (7) is designed as a one-piece moulded plastic part, wherein the tube head and the tube casing (2) delimit a tube interior (TI). The closure cap (13) has at least one barrier layer (11) on its cover portion (13.2) inner surface facing the casing portion (13.1).
