Abstract (en)
[origin: WO2020025504A1] The subject of the invention is a binder comprising: at least one raw clay comprising at least one clayey mineral, the total weight content of clayey mineral ranging from 1 to 60% relative to the weight of binder, at least one limestone or dolomite filler, at least one water-retaining agent, and at least one additive chosen from flocculating agents, water-repellent agents, latexes, hydraulic binders, bonding agents and cationic surfactants, with the proviso that, when the binder comprises a hydraulic binder, the total weight content of hydraulic binder is less than the total weight content of clayey mineral.
