Abstract (en)

[origin: CN112914407A] The invention relates to a hinge for a toilet seat arrangement, comprising a first hinge part and a second hinge part, wherein the first hinge part has a pivoting portion with a pivot damper for mounting a toilet support pivotably in a damped manner about a first axis, and the second hinge part has a mounting portion for mounting on a toilet body, wherein the first hinge part has a connecting portion with a joint portion, and wherein the second hinge part has a receptacle with a joint receptacle, wherein, when the joint portion is in the joint receptacle, a joint is provided and the first hinge part can be pivoted relative to the second hinge part about the joint about at least one second axis which is different from the first axis and cannot be pivoted about the first axis. The invention additionally relates to a toilet seat arrangement having such a hinge.
