Abstract (en)
A rail vehicle body (110) extends in a longitudinal direction (LD) and has, when seen perpendicular to the longitudinal direction (LD), a substantially constant main cross-sectional profile along the longitudinal direction (LD). The rail vehicle body (110) includes at least one local widening structure (120) projecting beyond the main cross-sectional profile in a given region of rail vehicle body (110) to provide more interior space for a piece of equipment such as a passenger toilet compartment (160).
