Abstract (en)
[origin: EP3831732A1] Container for spherical products, particularly fruit, that is designed for storing pieces of fruit with a near-spherical configuration, comprised of a rectangular laminar body made of cardboard, paper or paperboard defining a main central sector (1), as well as two lateral sectors (2) that are defined by respective longitudinal folding lines (3), with the main sector (1) comprising a closing tab (7) on one of the ends thereof in order to roll said sector on the pieces of fruit (4) contained therein and to fix it to the opposite end thereof, with the lateral sectors (2) comprising arched folding lines (9) as well as adhesive areas (12) in order to fix the ends thereof to the central sector (1), with said arched folding lines (9) determining lateral retention walls for the fruits contained therein when the container is unfolded, with the particularity that the container comprises die cut and/or perforation lines for opening the closed container.
