Abstract (en)

The present invention provides a glass composite, a preparation method thereof, a casing, a display device and a terminal device. The glass composite comprises a first glass member and a second glass member which are at least partially connected with each other at the surfaces, wherein the glass composite has a light transmittance not lower than 95% of the light transmittance of the one, with the lower light transmittance, of the first glass member and the second glass member.
