Abstract (en)  
[origin: WO2020031126A1] The invention concerns a footwear structure (1) for luminous footwear, comprising an upper (2) and a connection unit (4) combined with the upper (2), wherein the connection unit comprises a main body (5) and connecting cables (6) that extend from the main body (5) to connect the connection unit to a control unit and/or a battery of an electronic light system, wherein the main body (5) is provided with a connection port (7) for connecting with an outer electronic device and junction points (8) for the contact of the connecting cables, wherein the connection port (7) has an accessing direction (A) and the connecting cables (6) at the junction points (8) have an extending direction (E), wherein the accessing direction (A) and the extending direction (E) are neither aligned nor parallel to each other, the accessing direction (A) and the extending direction (E) forming an angle different from 180°.
