Abstract (en)

[origin: WO2020031038A1] The present invention relates to the field of pathological anatomy, especially the sector related to printing codes on slides used in hospital departments and, more specifically, concerns a printer for slides which allows writing, by means of a laser, of 1D - 2D (barcodes or data matrix) and alphanumeric codes so as to allow, in the reading phase, identification of the code printed on the slides by means of suitable readers.
