Abstract (en)
[origin: AU2020286188A1] Abstract The invention relates to a drawer (2) accommodated in a cabinet (1), in particular a kitchen cabinet drawer, having pull-out telescopic rails (4), consisting in each case of a stationary rail (5) and a moving rail (6), a longitudinal fastening bracket (9) being attached to the moving rail (6), the longitudinal fastening 5 brackets (9) further being supports for a bottomless, rigid suspension frame (25) in which one or more waste containers (26) can be held in a freely hanging manner, and the longitudinal fastening bracket (9) having an inwardly facing opening (21) of U-shaped cross-section. According to the invention, for an advantageous design, the suspension frame (25) has a hollow profile (24) assigned to the U-opening (21) of the longitudinal fastening bracket (9), with upper and lower profile portions (30, 31) in relation to a use position, wherein the profile portions (30, 31) fit into the U-opening (21) as a result of the vertical spacing of the profile portions, and the upper profile portion (30), which has a continuously straight cross-section, forms a rest edge (29) for a waste container (26). 15 Figure 4 29 25-27- 15 44 g
