Abstract (en)

[origin: WO2021116054A1] A liquid dispenser (6) for dispensing washing liquid comprises a main body (11), an intermediate element (12) which is mounted rotatably about an intermediate element rotation axis (13) on the main body (11), and a spray element (16) which is mounted rotatably about a spray element rotation axis (17) on the intermediate element (12) relative to the main body (11) and the intermediate element (12) and has at least one spray nozzle (40) for dispensing the washing liquid, wherein the intermediate element rotation axis (13) is spaced from the spray element rotation axis (17), and wherein a rotation rate quotient of an intermediate element rotation rate (ω_Z) of the intermediate element (12) relative to the main body (11) and a spray element rotation rate (ω_S) of the spray element (16) relative to the main body (11) is variable.
