Abstract (en)

[origin: EP3834950A1] The present invention relates to a slot die having a structure in which a stripe core and a cover core are mounted between an upper body and a lower body, and a choke bar is inserted into a penetration path formed in the upper body, and an electrode slurry coating apparatus comprising same, wherein, since a space is formed in which the choke bar can be moved by the cover core, the flow rate of a slurry through the choke bar can be adjusted regardless of the shape of the stripe core.
