Abstract (en)  
An adjustable refrigerator drawer assembly (100), comprising a drawer body (10) having a cavity for placing articles; a sliding assembly (20), slidably disposed in the drawer body (10) in a direction perpendicular to the drawing direction of the drawer body (10); and at least one partition plate (30) detachably connected to the sliding assembly (20) and configured to partition an accommodating cavity and move along with the sliding assembly (20) to change the sizes of chambers partitioned by the partition plate (30). The adjustable refrigerator drawer assembly (100) can effectively use the space of the drawer body to simplify the disassembling and assembling process of the partition plate (30).
