Abstract (en)

[origin: WO2020036558A2] The present invention relates to a dishwasher (1) comprising; a body (2), a tub (3) inside the body (2) wherein the washing operation takes place, a water conduit (4) whereby the water to be used in washing operation is transferred to the tub (3), an agitator (5) fluidly connected to the water conduit (4) and wherein the agitator (5) is rotatable placed on to the base of the tub (3) around a stationary vertical axis, a spray arm (6) in fluid communication with the agitator (5) so as to spray the dishes with water, and wherein the spray arm (6) is rotatable placed on to the agitator (5) around a moving vertical axis, which upon rotation, rotates around the stationary vertical axis in a circular trajectory, a base gear (7), placed concentric with and inside the agitator (5), forming a water channel (8) in between the agitator (5) so as to divert the water coming from the water conduit (4) along the radius and towards the circumference of the base gear (7), whereon the passage of the water forces the base gear (7) to rotate around the stationary vertical axis via a plurality of fins (9) placed consecutively along the circumference of the base gear (7).
