Abstract (en)
[origin: WO2020035841A1] The invention relates to a collapsible scooter and a handlebar (10). The collapsible scooter comprises a handlebar (10) which comprises a steering rod (12) with at least one grip (11) extending laterally therefrom in the deployed state. The at least one grip (11) can be pivoted in relation to the steering rod (12) about a folding axis (14) between a deployed state and a folded-in state by means of a folding joint (13), wherein a securing sleeve (15) that can be perpendicularly rotated in relation to the folding axis (14) is provided, which extends over the folding axis (14) of the folding joint (13) and comprises a lateral recess (17) such that the handle (11) is pivoted in a first position of the securing sleeve (13) from the deployed state into the folded-in state and the handle (11) is secured in at least one second position of the securing sleeve (15) in the deployed state.
