Abstract (en)
[origin: WO2020034129A1] A portable device (2) for finding a vehicle (1), as well as a suitable method, which is at least partially executed in the portable device (2), as well as a system for finding a vehicle (1). For this purpose, the portable device (2) has at least one signal receiving means (21) which is configured to receive a signal (S) sent out by the vehicle (1) and to determine therefrom a distance between signal receiving means (21) and a device sending the signal (S), and at least one indicating means (22) which is configured to output an indication depending on the determined distance.
