Abstract (en)  
[origin: EP3839333A1] The present invention refers to a luminaire cover unit (5) for a flat luminaire (1) comprising an integral luminaire cover (6) having a flat light transmission section (60) to allow light to pass through, which light transmission section (60) only extends substantially within a plane (E), and a receiving section (61) which is bulged away from the plane (E) to form a receiving space (62) delimited by the receiving section (61) with an opening (63) within the plane (E) to access the receiving space (62). The luminaire cover unit (5) further comprises a lighting electronic (8) being at least partially received within the receiving space (62). The present invention further refers to a flat luminaire (1) equipped with the said luminaire cover unit (5).
