Abstract (en)

[origin: EP3839383A1] The disclosure relates to a vehicle climate system (100) configured to generate a snow effect inside of a vehicle (1), the vehicle climate system (100) comprises: a liquid container (9) configured to contain a liquid for generating artificial snow; an air inlet (19) configured to supply air to the inside of the vehicle (1) for generating artificial snow; and at least a first cooler outlet (30a,30b,30c,30d) in fluid communication with the liquid container (9) and the air inlet (19) and configured to output artificial snow inside of the vehicle (1). The disclosure further relates to a method for generating a snow effect inside of a vehicle (1) and a computer program product (500).
