Abstract (en)
[origin: WO2021013692A1] The invention relates to a thread roughing device (10) having at least two first rollers (36, 37) mounted on a carrier (30) and at least one further roller (46) mounted on a movable component (40). For easier operation, the invention provides that the further roller (46) is movable in the direction of the first rollers (36, 37) by means of a contact pressure device (40) that is loaded by a spring (26) and is mounted in a movable manner.
