Abstract (en)

[origin: WO2020038527A1] The invention relates to a method for unlocking a motor vehicle lock (1) and to a motor vehicle lock (1), in particular an electrically actuatable motor vehicle lock (1), having a locking mechanism (2) with a rotary catch (3), at least one pawl (4), wherein the rotary catch (3) can be latched by means of the pawl (4) in at least one latching position (HR), and a release lever (9). The latched locking mechanism (2) can be unlocked by means of the release lever (9), and the rotary catch (3) can be moved, in particular into a lifted position (ÜH), in order to unlock the locking mechanism (2) at least indirectly by means of the release lever (9).
