Abstract (en)

[origin: WO2020038703A1] The present invention relates to a method of supplying injection fluid to a subsea facility, the method comprises the step of arranging a storage container (12) at a first subsea location, supplying the storage container with injection fluid from a surface facility (14), moving the storage container to a second subsea location and supplying the injection fluid from the storage container at said second subsea location to the subsea facility, wherein the second subsea location is closer to the seabed (3) than the first subsea location. Preferably the storage container at the second subsea location is supported by the seabed.
