Abstract (en)

[origin: WO2020037653A1] There is provided a method of operating a server of a first network. The method comprises generating (100) an indication of an action to initiate for handling a transfer of background data from the server to a user equipment if the transfer fails to satisfy one or more conditions of an assigned background data transfer policy for the transfer. The method also comprises transmitting (102) the indication for a node of a second network to acquire the indication and initiate the action if the transfer fails to satisfy the one or more conditions of the assigned background data transfer policy.
