Abstract (en)  
A hanger having a shaped body (51) for supporting garments and a hook (1) coupled to the body (51) of the hanger (50). Such a hook comprising a first end (3) bent like a hook, a substantially straight second end (4) and joining means (6) to allow the stable coupling of the hook (1) to the body (51) of the hanger (50). Said joining means (6) comprising an upper laminar element (8) having a first hole (14) and capable of being operatively arranged upstream and abutting against the body (51) of the hanger (50), a lower laminar element (12) capable of being operatively arranged downstream and abutting against the body (51) of the hanger (50) and having a second hole (15). Such joining means (6) of the hook (1) also comprising a spacer (20) for stabilizing the hook (1) when coupled to the body (51) of the hanger (50).
