Abstract (en)
[origin: EP3842022A1] A dental chair foot switch and a dental chair are provided, the dental chair foot switch being easy to operate when applied to a dental chair that is lifted and lowered with a link mechanism. A dental chair (10) includes a base (11) that is installed on an installation surface, a leg unit (14) that is coupled to the base (11), and a chair unit (15) that is lowered with the leg unit (14) being laid down and is lifted with the leg unit (14) being raised up and a dental chair foot switch (27). The dental chair foot switch (27) is constituted, at a rear end of the base (11) in the dental chair (10), as part of a plate-shaped base portion (12) behind the leg unit (14) in a laid-down state in which the chair unit (15) is lowered to a lowermost position.
