Abstract (en)
The invention teaches an environmentally friendly straw and its manufacturing method. The straw includes a tubular body (1) having a through channel (12) inside connecting two openings (11) respectively at two ends of the tubular body (1), an outer layer (14) surrounding the tubular body (1) between the two openings (11) formed by a leveling machine (3), an inner layer (13), as an inner wall of the tubular body (1), surrounding the channel (12) formed by a honing machine (2). The straw is manufactured by leveling the tubular body (1), and honing the channel (12) by a honing machine (2). As such, a smooth inner layer (13) between the channel (12) and the tubular body (1) is achieved so that the straw is convenient to clean and use.
