Abstract (en)
[origin: WO2020043498A1] The invention relates to a bidet device, comprising a housing, a water tank arranged in the housing, a device for conveying the water, which device is arranged in the housing, a cleaning agent tank, a cleaning agent pump, and a shower head having outlet nozzles. The aim of the invention is to provide a bidet device suitable for mobile use and with trouble-free operation, in the case of which bidet device the feeding of cleaning agent and water can be controlled separately. This aim is achieved, according to the invention, in that the operation for the specific feeding of water and cleaning agent and mixing thereof is moved into the shower head. In a particularly preferred embodiment of the mobile bidet device, the mobile bidet device does not need any electrical energy.
