Abstract (en)
[origin: WO2020043800A1] The invention relates to a domestic dishwasher (1) comprising a washing chamber (4), a controller (100) for running a washing program from a number of washing programs, and a metering system (110) comprising a supply unit (112) for receiving an individual dose of a first cleaning agent and/or supplying the individual dose into the washing chamber (4) at a metering point in time while running the washing program and comprising an automatic metering device (114) for automatically metering a plurality of metering quantities from a supply of a second cleaning agent provided as a solid material into the washing chamber (4) at the metering point in time while running the washing program, wherein at least one sensor device (120) is provided for detecting the state of the metering system (110) and emitting a sensor signal depending on the detected state of the metering system (110), and the controller (100) is designed to run the washing program depending on the sensor signal.
