Abstract (en)
[origin: WO2020043971A1] Method for driving a motor vehicle powertrain, according to which the powertrain provides a drive torque (Ce) to at least one first wheel of the motor vehicle in accordance with a torque (Cc) controlled by the driver of the motor vehicle and, when there is a change in the controlled torque, an inertia compensation torque is added to the controlled torque; in the event of a slip (P) of the at least one first wheel, the addition of the inertia compensation torque is deactivated.
