Abstract (en)
[origin: WO2020043692A1] The invention relates to a method for producing a packaging, wherein a lower film web (8) is unrolled from a roll and is transported along a packaging machine by means of two continuous chains, which each circulate around at least two gears, and at the same time a packaging depression (6) is formed into the lower film web (8) and said packaging depression is filled with a good to be packaged and subsequently an upper film is sealed onto the packaging depression (6).
