Abstract (en)
[origin: WO2020043973A1] A glass panel comprising a glass substrate, onto which the following is deposited in succession, from a first surface of said substrate: a first coating comprising a layer having infrared reflection properties or comprising a set of layers, at least one layer of which has infrared reflection properties; a second coating above said first coating comprising an organic or mineral layer, said second coating having a raised texture, said texture being such that its average pitch P_m is less than or equal to 5° and the percentage of the textured surface with a pitch that is greater than 5° is greater than 5%.
