Abstract (en)
Provided are a multi-layered glass and a fitting, which are configured so as to prevent formation of a gap connecting the inside of a room to the outside thereof. Multi-layered glasses 310, 320 are provided with first glasses 311, 323, second glasses 313, 321, and reinforcement materials 316, 325 disposed between the first glasses 311, 323 and the second glasses 313, 321, respectively, wherein: at least at one respective ends of the multi-layered glasses, one respective ends of the second glasses 313, 321 have protruding parts 313b, 321b that protrude toward a planar-direction outer side of the glass surfaces of the second glasses 313, 321 beyond end surfaces 311a, 323a of the first glasses 311, 323; and shielding parts 316a, 325a are provided to portions, of the multi-layered glasses 310, 320, each corresponding at least to an interior-side glass surface or an exterior-side glass surface of the protruding part 313b, 321b.
