Abstract (en)

[origin: WO2020051315A1] A rotating and articulating bed has a fixed bed frame, a rotation assembly mounted on the fixed bed frame, a pivot assembly mounted on the rotation assembly and an articulating bed frame mounted on the pivot assembly. The articulating bed frame contains a plurality of pivotally connected distinct portions. The rotation assembly rotates the pivot assembly and the articulating bed frame with respect to the fixed bed frame on a plurality of discrete wheel bearings around a vertical axis passing through the rotating and articulating bed. The articulating bed frame articulates the distinct portions and the pivot assembly tilts the articulating bed frame with respect to a horizontal plane that is perpendicular to the vertical axis independent of rotation by the rotation assembly and articulation by the articulating bed frame.
