Abstract (en)

[origin: WO2020048690A1] The present invention relates to a dishwasher (1) comprising a body (2); a washing tub (3) which is disposed in the body (2) and wherein the washing process is performed; a door (4) which interrupts the contact of the washing tub (3) with the outer environment; and a delivery element (5) which is disposed under the body (2), one end thereof rising in an inclined manner from under the washing tub (3) towards the door (4) so as to collect the water overflowing from the washing tub (3) during the washing process and the other end thereof extending vertically towards under the body (2) so as to deliver the collected water towards under the body (2).
