Abstract (en)

[origin: WO2020049105A1] A toy construction set comprising a number of toy building blocks (1) forming a construction having multiple coupling sockets (4), and where the toy building set further comprises a number of coupling pins (3) and a flexible sheet (2) having at least one hole (10), and where each of the coupling pins (3) extends in a longitudinal direction between a first end being shaped for releasable attachment of the pin to one of the coupling sockets (4, 4a), and a second end extending away from the coupling socket (4, 4a) in the attached position of the pin (3) in the socket (4, 4a), and where the second end of the pin comprises a head (7) arranged distally on a neck (8) that has a cross section allowing it to pass freely through the hole (10), and wherein the size and shape of the hole (10) and the size and shape of the head (7) are adapted such that it is impossible to pass the head (7) through the hole (10) without tearing or providing a plastic deformation on the flexible sheet (2).
