Abstract (en)
[origin: WO2020048929A1] The present invention relates to a mixer having a container (50) having at least one driven shaft (40), to which mixing arms (20) carrying blades (30) are secured at distances from one another. According to the invention, a protective part is provided that surrounds at least regions of the individual mixing arms (20), securing devices, and the shaft (40). The present invention further relates to a protective part segment and to a method for protecting the shaft, mixing arms and securing elements on a mixer.
