Abstract (en)

[origin: WO2020048851A1] The invention relates to a hot water-cleaning device which comprises a throughflow heater (14) with a heating device (16), a nozzle device (34) for spraying hot water, a pump (26) which is fluidically connected to the throughflow heater (14), and a connection (42) for a battery device (40) and/or a battery device (40) which provides electric energy for operating the heating device (16), wherein the heating device (16) is operated such that the throughflow heater (14) provides hot water without a water-steam phase transition.
