Abstract (en)

[origin: WO2020050791A2] The present invention relates to a laundry washing and drying machine (1) comprising a drum (2) wherein the laundry is placed to be washed and dried; an air circulation duct (3) wherein the process air (PA) circulation, providing the drying of the laundry, is performed in the drying process after the washing process; a fan (4) which provides the circulation of the process air (PA); at least one condenser (5) which condenses the process air (PA), and a cooling line (6) which enables the condenser (5) to be cooled down with the water taken from the outer environment.
