Abstract (en)

[origin: WO2020048563A1] The invention relates to a drive unit for motor-vehicle applications, in particular an electromotive opening drive unit as a component of a motor vehicle lock, preferably a motor vehicle door lock, comprising a electromotive drive (6, 7, 8) for acting on a control element (4), and comprising a manually actuatable manipulation element (13, 14) which, at least in an engaged position with the electromotive drive (6, 7, 8), is designed for reversing same, characterised in that the manipulation element (13, 14) for reversing the electromotive drive (6, 7, 8) must first be transferred from a base position into the engaged position.
