Abstract (en)

Clip for attaching a panel in a fence, particularly a mesh panel with vertical and horizontal wires (5), whereby the panel (4) is mounted between vertical fence posts (2) in the form of a profile (6) with grooves (7) delimited by parallel legs (14) of the profile and whereby the panel (4) is attached with its side edges (8) in the grooves (7) of the profile (6), characterised in that the clip (9) contains a support platelet (28) with a width (E) delimited between two side edges and a supporting edge (27) to rest against the bottom (22) of the groove (7), said support platelet (28) being intended to be attached horizontally in said groove (7) of the fence post (2) to support a horizontal wire (5b) of the panel (4) and containing at least one groove (29) for a vertical wire (5a) on said side edge (8) of the panel (4), whereby said groove (29) is essentially perpendicular to said supporting edge (27) and whereby said groove (29) is connected with an edge of the support platelet (28) via an entry (31) for the vertical wire (5a).
