Abstract (en)

[origin: US2020085123A1] An elongate elastic member for assisting an athletic motion and a lower-body garment incorporating the elongate elastic member are provided herein. The elongate elastic member may have various configurations that permit it to be attached to a foot or shoe of a wearer and a torso of the wearer. The structure and as-worn configuration of the elongate elastic member and associated lower-body garment augment or inhibit joint moments during an athletic motion, improving the actual or perceived amount of energy expended to complete the athletic motion.
