Abstract (en)  
[origin: KR20200107756A] Disclosed is a cleaner. The disclosed cleaner includes a conveying device, and a dust collecting device that is provided to be connectable to the conveying device and is configured to filter the dirt received from the conveying device, wherein the dust collecting device includes a housing having a first dust collecting chamber and including a guide portion recessed inward from an outer surface; a handle provided to be movable outside the housing and disposed to cover at least a portion of the guide portion; a first dirt removal member provided to be movable inside the housing as the handle moves, and configured to discharge dirt collected in the first dust collecting chamber; and a link connecting the handle and the first dirt removal member and configured to guide movement by the guide part.
